Fire Training

The state of the art Fire Training Leipzig/Halle Airport was opened in 2010. The attachment have a gas-fired Boeing-747 fire simulator to train firefighters in coping with emergency situations on aircraft. The centre provides a whole range of theoretical and practical training courses, which can either be booked as a package or individually. We would like to invite you to familiarise yourself with the extensive range of training courses and we would be delighted to welcome you to the fire training facility at Leipzig/Halle Airport.
